WORK EXPERIENCE

ADVISOR & EFFICIENCY ENGINEER
Evi Solutions | 2024 - 2025

- Advising the start-up team on technology strategy, emerging trends, and business opportunities in AI, Web3, and digital platforms
- Contributing to overall technology, strategy, and operations by wearing multiple hats across development, design, testing, and consulting
- Conducting market analysis to track emerging tech trends and providing strategic guidance for future business opportunities
- Assisting the team in implementing AI automation and optimizing workflows using modern AI development tools
- Creating code, content, UI concepts with AI-powered IDEs (Cursor, V0, Replit) and generative tools such as Midjourney, LeonardoAI, Ideogram, KlingAI, Higgsfield
- Helping develop and integrate AI-powered features into the job search platform to improve usability and functionality
- Performing manual testing, identifying UX issues, and providing practical design feedback
- Operating a Bitcoin node, maintaining the Ord client, and exploring Inscriptions, Ordinals, and Runes
- Developing and maintaining a crowdfunding platform on the Sepolia testnet

FOUNDER
Oddworld W3 | 2021 - present

- Founder and hands-on builder working on Web3-focused products involving blockchain-native applications, AI-assisted systems, and modular platforms
- Designing and developing full-stack web applications with Web3 integrations (wallets, on-chain data, token-gated logic)
- Experimenting with smart contracts, DeFi primitives, DAOs, tokenomics, and decentralized application flows
- Contributing across the full product lifecycle, from early concepts and architecture ideas to MVP implementation and iteration
- Building and launching NFT collections (art + utility) using AI-assisted creative and development workflows
- Developing and maintaining private community infrastructure, including custom Discord bots and automation tools
- Learning and applying principles of scalable system design, composable services, and gamified digital experiences

SUPERVISING CIVIL ENGINEER
Amiga Kraljevo | 2021

- Company Restructuring and Workflow Improvement
- Overseeing and managing all on-site construction activities
- Planning and coordinating the execution of construction works
- Maintaining accurate and up-to-date construction site records and logs
- Supervising the assembly and installation of prefabricated structures

CLIENT COORDINATION ASSISTANT
Airport City Belgrade | 2016 - 2018

- Managed and coordinated finishing works and renovations across more than 14,000 m² of Class A office space within the Airport City Belgrade business complex, delivering projects for high-profile tenants including Telenor, EAP Shared Services, NCR, PwC Serbia, and Mondelez.
- Serving as the primary point of contact for clients regarding requests for renovation, adaptation, and the fit-out of both existing and newly developed office spaces
- Leading a team of engineers responsible for all finishing works, including installation of mechanical, electrical, and plumbing systems

MARTIAL ARTS INSTRUCTOR
Bujinkan OM Dojo | 2015 - present

- Teaching traditional Japanese Ninjutsu, including Ninpo, Budo, Budo Fitness, and Zen practices
- Providing instruction to students of all age groups
